The Creed of Gnostualism

In Gnostualism

In Gnostualism, we hold the belief that the realm of Pleroma, which embodies the fullness of God, exists beyond the threshold of the singularity at the edge of our Universe, where the big bang originated. This belief suggests that salvation entails discovering one's path to this singularity, often referred to as the Gates of Heaven, and transcending it.

Salvation and Beyond

By passing through this singularity, one attains eternal salvation, freeing oneself from the cycles of rebirth and reincarnation indefinitely.

The Essence of Gnosis

This concept lies at the core of Gnosis, also known as esoteric or secret knowledge, as espoused by the Gnostics. Similar to the teachings of Thelema and Hermetics, where symbolic representations convey deeper meanings, the esoteric knowledge of Gnostualism serves as a guide to understanding the underlying truths of existence.

Historical Context

It's important to recognize the historical context surrounding such knowledge. In ancient times, disclosing these teachings could lead to persecution and even death for heresy. Yet, through the ages, courageous individuals like Rev. Dr. Joseph D. Smith, D.D., have sought to preserve and share these profound insights, guiding seekers towards enlightenment and liberation.
